

RNA ISOLATION MORTER & PESTLE - 1No.
(Tender Ref. No. NIN/ST/12/Tender/2019/RNA Mortar & pestle/21)

Features:

- Designed for comfortable hand-held use/can be mounted to motor stand for lengthier processing
- Interchangeable quick connect rotor stator generator probes provides flexibility to process samples from 200 μ L to 100mL
- Stainless steel probes (5mm - 10mm diameter) are designed for long life and are easy to disassemble for cleaning
- Plastic probes virtually eliminate risk of cross contamination and carryover between samples, can be cleaned for reuse in most of the cases

Specifications:

- Speed: Variable from 5,000 to 35,000rpm
- Power: 150w max
- Sound: <72dB
- Diameter Probe: 5mm
- Length Probe: 75mm
- Bottom Type: Flat
- Material: Stainless steel
- Warranty: 3 years
